INTRODUCTION

Paper records are no longer enough

> **In today's food market it is not enough to be safe — you have to prove it, on any day, to any inspector.**

Paper files and scattered spreadsheets mean missing records, temperature readings nobody sees in time, and days of searching before every inspection. HACCP, ISO 22000 and regulators all call for one digital system that is traceable and audit-ready at any moment.

INSPECT PRO gives you one live platform your team fills on the phone and management follows the same day — so any record is in the inspector's hands in minutes, not days.

From piles of files to one live screen

What changes from day one:

Minutes, not days
Any record, any branch, any date — one search.

Wrong readings stand out instantly
Every unit has its limits; anything outside them is flagged as it is typed.

Every branch on one screen
Who logged today, who is late, and what is still open.

ABOUT US

Built by food-safety people, for food-safety teams

INSPECT PRO is a UAE-based company that builds digital systems for food safety, quality and compliance.

The platform was born inside the daily work of a multi-branch meat company — real chillers, real receiving checks, real municipality inspections. Every screen was shaped by the people who fill the records and the QA teams who face the inspector; that is why it is fast on a phone at the branch and complete enough for management and auditors.

📍 Based in the UAE

English & Arabic

Cloud — no server

With INSPECT PRO, food businesses can:

Digitise daily records

Turn paper HACCP forms into phone checklists — in the same layout.

Trace products from supplier to branch

The item code links shipment, receiving, storage and branches in one search.

Close non-conformities with evidence

Every case has a reference number, an owner and documented proof before it closes.

Stay inspection-ready every day

Complete records and clear indicators for every branch, on any day.

VISION · MISSION · VALUES

What drives us

Our vision

To be the region's leading digital platform for food safety and quality — where compliance is a daily habit in every branch, not an event before the inspector's visit.

Our mission

To help food businesses run food safety and quality with confidence and efficiency, through an easy cloud platform that speaks the branch's language and meets international standards and local requirements.

Our core values

Inspection first

Every record is built to be shown to an inspector within minutes.

From the branch floor

Designed with branch staff and QA teams, not around a template.

Your forms, your layout

Your forms stay as they are — they just become digital.

Your data is yours

Export your records to Excel or PDF at any time.

A partner, not a vendor

We set up the system with you and train your team until it works.

OUR CORE SOLUTIONS

One platform covering the full food-safety & quality cycle

01

HACCP daily logs

HACCP & DAILY LOGS

- Receiving, temperature, cleaning and cooking checks on the phone.
- Per-unit limits flag out-of-range readings at once.

02

Traceability

TRACEABILITY

- Supplier → receiving → branch in one search.
- Production and expiry dates calculated automatically.

03

Non-conformities & actions

NCR & CAPA

- Reference number, owner and due date for every case.
- No case closes without documented evidence.

04

Internal audits with evidence

INTERNAL AUDITS

- Audit on the phone with customisable checklists.
- Each finding sends the branch a link to upload proof.

05

Supplier approval

SUPPLIER APPROVAL

- Suppliers self-assess through a secure link.
- Their result shows on every receiving record.

06

Training & health cards

TRAINING & OHC

- QR-code training quizzes and certificates.
- Alerts before health cards expire.

07

Returns & complaints

RETURNS & COMPLAINTS

- Branch returns, customer returns and condemnations.
- Quality complaints e-mailed to branches and suppliers.

08

Health & safety

HSE · ISO 45001

- Risk register, work permits and incidents.
- Fire equipment, evacuation drills and PPE.

09

KPIs & reporting

KPIs & ANALYTICS

- Compliance per branch and period comparison.
- PDF and Excel reports ready for management and inspectors.

COMPETITIVE ADVANTAGES

Why it actually works at the branch

Built for the phone
Staff fill a record at the branch in seconds — large text, clear buttons.

English & Arabic
Every user works in their own language, every screen in the right direction.

Works offline
Records are kept on the device and sent automatically when the network returns.

Unlimited users
Precise permissions per account: view, add, edit, delete — per branch.

Your forms as they are
Paper forms become digital, and reports print in the same design.

Full backup
Export every record to Excel and PDF, matching the original layout.

Fully cloud-based
No server, no IT team — opens in any browser on any device.

A version per sector
Meat, sweets, restaurants, factories, retail, warehouses.

Before — paper & spreadsheets
- Files in every branch; gaps surface only at inspection.
- A wrong temperature stays in the logbook with no action.
- Days of collecting and searching before every audit.

After — INSPECT PRO
- Every branch live on one screen.
- Out-of-limit readings are flagged and open a corrective action.
- Any record ready for the inspector in minutes.

TARGET SECTORS

Designed for every food business

Meat
Butcheries & abattoirs

Sweets
& bakeries

Restaurants
& cafés

Central kitchens
& catering

Food factories
& manufacturing

Retail
& supermarkets

Distribution
& cold stores

IMPLEMENTATION

Three steps to go live

01

A short demo on your branches

We show the platform on your business type and your own records — 30 minutes, no commitment.

02

We set it up with you

Your branches, forms, users and permissions — plus on-site training for your team.

03

Your team logs, you follow live

Staff fill checks on their phones; QA and management follow every branch from one dashboard.

INTERNATIONAL & LOCAL COMPLIANCE

Built on the standards inspectors ask for

HACCP

Hazard Analysis & Critical Control Points

CCP records, critical limits, corrective actions and verification.

ISO 22000

Food Safety Management System

Internal audits, non-conformities, suppliers, traceability, document control.

GMP GHP

Good Manufacturing & Hygiene Practices

Cleaning, pest control, personal hygiene, calibration and maintenance.

ISO 45001

Occupational Health & Safety

Risk register, work permits, incidents, evacuation and fire equipment.

Protecting your data

- ✓ Fully encrypted connection (HTTPS) between device and server.
- ✓ Each company's data fully isolated at database level.
- ✓ Named accounts with precise permissions per branch and section.
- ✓ A reference number for every record, and a log of who changed what.
- ✓ Supplier and branch links that expire and can be revoked.
- ✓ A full backup you can download at any time.

WHY

INSPECT PRO?

We are not just software. We bring together a working platform, hands-on food-safety experience and local support that understands UAE regulatory requirements.

Proven on real branches

Used every day by a multi-branch company — every feature came from a real problem at the branch.

A team that knows food safety

Built by people working in QA and food safety, who know what inspectors and auditors ask for.

Clear prices and a free trial

A published price per branch, and an instant free trial before any commitment.

Fast local support

Support in English and Arabic by phone and WhatsApp, with on-site training.

THE PLATFORM ON MOBILE

The branch logs it, management sees it now

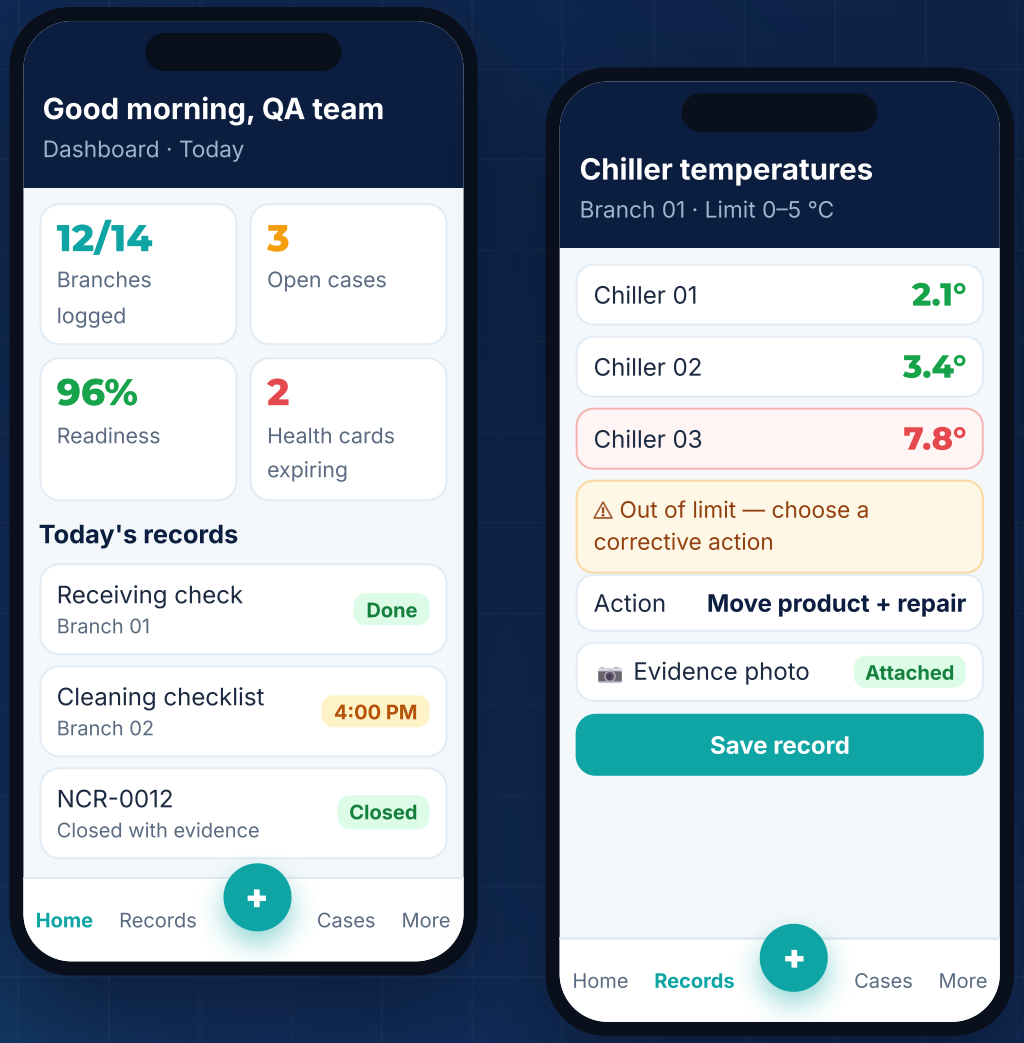

The same platform on phone and computer — nothing to install.

✓ A daily dashboard: who logged, who is late, what is open.

✓ Temperature entry checked against limits as you type.

✓ Evidence photos straight from the camera.

✓ Saves offline and sends automatically later.

FLEXIBLE OPTIONS FOR EVERY BUSINESS

A clear price per branch

Pick the plan that fits your budget. Every plan: unlimited users · English & Arabic · a free trial before you start.

Essential

Economy

350 AED / branch / month

AED 300 billed annually

- ✓ All daily food-safety logs for your business type
- ✓ Limits checked as you type, corrective actions
- ✓ Health cards and training certificates, with expiry alerts
- ✓ Excel & PDF exports, works offline

Most popular

Professional

Balanced

490 AED / branch / month
